

Here is the guideline to refill the battery water (distilled water):

Power off, take out the battery in safe status. The batter for Semi Electronic stacker is shows in Picture 1

**Open cover
from here**

**they are
individual
cell, you will
need to add
distilled
water in each
of these cells**

twist to open, and then add the distilled water to mini level (mini level line shows outside of the battery)

mini level line

keep air vale open, don't block it
