

**HELI**

Multiple special designed features

**2-3.8 t**  
**K2 series Internal Combustion Counterbalanced Forklift Truck**

Model	Series	Capacity	Max. Lift Height	Max. Load Capacity	Max. Travel Speed	Max. Turning Radius	Max. Traction Force	Max. Climbing Ability
K2.0	K2.1	K2.2	K2.3	K2.4	K2.5	K2.6	K2.7	K2.8

**AMERICA HELI (CHINA) LTD.**

**HELI**

**2-3.8 t**  
**K2 series Internal Combustion Counterbalanced Forklift Truck**

**Reliability improved**

- 1. Improved fuel efficiency and stability.
- 2. Reduced fuel consumption and improved fuel economy.
- 3. The quality performance of the engine is improved.
- 4. The overall strength and rigidity of the chassis is improved.
- 5. The strength and rigidity of the chassis is improved.
- 6. The overall strength and rigidity of the chassis is improved.
- 7. The overall strength and rigidity of the chassis is improved.
- 8. The overall strength and rigidity of the chassis is improved.

**Better performance in energy saving and consumption reducing**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**The operation efficiency improved**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**K2 series 2-3.8 t**

**Operation comfort improved**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**The performance of easy maintenance is further improved**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**Better performance in energy saving and consumption reducing**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**The operation efficiency improved**

- 1. The overall strength and rigidity of the chassis is improved.
- 2. The overall strength and rigidity of the chassis is improved.
- 3. The overall strength and rigidity of the chassis is improved.

**K2 series 2-3.8 t**
