Forklift Slipper | Forklift Extension

Forklift slippers are designed and manufactured to temporarily extend existing fork tynes and shouldn't be used as a permanent attachment.

In accordance with AS2359.15 fork slippers used for general usage should be no longer than 167% of the supporting tyne's length. If the slippers are longer than 167%, then the usage of those slippers shall be restricted to their specified application.

When using Fork Slipper Tyne Extensions, caution must be exercised to ensure that they are used only for load stabilizing purposes and that the load is uniform and fully supported by the appropriate fork tyne.
